Dear Sir/Madam,

A590 Ayside to Brettargh Holt Safety Cameras

We're always exploring ways to improve safety on our roads, some of the ways we do this is by using collision data.

A detailed review along the A590 highlighted the 11 mile section from Ayside to Brettargh Holt roundabout required improvements due to a high percentage of incidents resulting in fatality or serious injury.

To improve safety and reduce harm to road users we're planning to install Average Speed Enforcement Camera technology at **fifteen locations** along the route.

What are we doing?

In addition to each camera being connected to a power source we will need to install associated signage to let approaching drivers know there's an average speed camera up ahead.

When will the work take place?

Work along the A590 – Ayside to Brettargh Holt roundabout will start on site in Autumn/Winter 2024/25. We'll share exact dates once we have them.

To keep disruption to road users to a minimum roadworks will be completed overnight or during off peak traffic hours (09.00 – 15.00)

How might our work impact journeys?

Every effort will be made to ensure the works are done safely and disruption is kept to a minimum. Due to the nature of the work, we expect to generate some noise and there could be delays to journeys. We would like to apologise in advance for any inconvenience caused and thank you for your patience.
